Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Preliminary Amendment Acknowledgment

Receipt is acknowledged of preliminary amendment filed on 1-2-2001 and 12-19-2000.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent No. 01-258204 (cited by applicant).

Japanese patent No. 01-258204 disclose a magnetic storage medium which consists of a substrate layer 11, magnetic recording layers 23 and 13, superconducting layers 15 and 25. There is provided layer 14 between magnetic layer 13 and superconducting layer 15 (Fig 1 and 4).

Magnetic storage medium of Japanese patent discloses the claimed invention except for the layer 14 being labeled as "insulation" layer.

However when there is provided a layer between two layers, such layer could act as means for reducing heat transmitted from one layer to the other layer or act as insulation layer.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention was made to use layer 14 of the medium of the Japanese patent as a thermal insulation layer in order to reduce heat being transmitted from the superconducting layer 15 to the magnetic recording layer 13

Allowable Subject Matter

Claims 10-13 are allowed.

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
